Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Our vote by mail system should be the standard used in every state. It is effective, efficient, and secure. Getting rid of it will mean long lines at voting places, less voter turnout (which is what Trump & his supporters want), voter intimidation, safety and security issues. Voting in America is our constitutional right and no one should be allowed to make it difficult for voters to exercise that right. Is there anything in this bill that provides free public transportation to voting places for disabled, elderly or non drivers? Is there a provision to make Election Day a mandatory state holiday so everyone has time to vote? Or is this bill the first step in limiting our right to vote, to limit the voice of the people in our state and federal government? We must oppose those who seek to chip away at our freedoms, who want to make our democracy smaller, who haven't the courage to stand up to a bully in Washington. I oppose SB210; this attempt to destroy one of our pillars of democracy.
