Senate Committee On Rules

Measure, Appointment or Topic:

SB210

This is an obvious attempt to suppress voter turnout in a primarily blue state. Vote-by-mail enables voters to research their choices and vote even if they aren't able to visit a voting booth due to work responsibilities or physical limitations. Our system is one of the things that makes our state great and should be imitated, not removed, especially given there is no credible evidence of the system being used for widespread voter fraud. This bill is a joke, being submitted by some babies who are afraid of social progress. ????
