Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I absolutely oppose forced in person voting. We have voted by mail for years. The ballots are validated and handled carefully. We are able to research the items requiring our vote and make much more educated decisions then we did in other places where we had to vote in a ballot booth. In addition to that we vote consistently and regularly because we can do so when our own time allows and without having to wait in lines or travel to distant voting locations. Elimination of voting by mail will negatively impact rural communities and voter turnout in general. Please, please do not eliminate voting by mail.
