Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

Good day legislators... I smacked my forehead when I saw this going around social media. Doing away with mail in voting might be the dumbest thing you people have wasted time on. Mail in voting is a joy and encourages engagement of citizens. It's secure, safe and takes all the stress out of voting. I find I have plenty of time to do some research about ballot measures and candidates for local/state/federal offices. This is essential to informed voting. I can't say enough how much i love mail in voting. You will destroy our state government if you end mail in voting. Voter engagement will drop. We'll have candidates voted in who are less qualified and all the stupid dubious ballot measures will wreak havoc on the system because people won't spend time looking into them and will be surprised by what's on the ballot when they show up to vote. Seriously, mail in voting is one of the best things about Oregon. Anyone of you legislators who votes for getting rid of mail in voting should pause, look in the mirror and think really hard about the kind of damage you're willing to do to rural communities. I'm so angry this is even being considered. do what's best for oregon and oregonians. keep mail in voting the standard. we do it well here.
