Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

The only thing wrong with our election process in Oregon is not being able to invoke an automatic removal of the treasonous idiot who is proposing this change.

Our process for counting votes had been one of the most fair and balanced method I've experienced in my life of voting across this country. I have spent time in several other states living and working in rural and urban areas as a military wife and this process had been well protected until this election. It is clear, by his own admission on several occasions, and through the analysis of data that has recently been released that Donald Trump used his loss in 2020 to gain access to our vote counting machines for the express purpose of a fraudulent election in the future and that day has already come to pass.

Our systems do need to be restructured now but it's to ensure that this act of treason can never be repeated. We need restructuring to ensure that votes are not rejected over partisan influences. We need to end Citizens United. We need to end corporate donors. We need to imprison the Cheeto in Chief and all of his brain lacking minions and throw away the key, Guantanamo sounds appropriate to me.
