Senate Committee On Rules

Measure, Appointment or Topic:

SB210

While mail in voting does make voting easier, it also opens a wide door to voting fraud. For this reason, France, Mexico, Belgium, Italy Sweden and Japan have all banned mail in voting. A majority of Republican voters believe that significant voting fraud has and does occur. Our voting system is the foundation of our country and we must have complete trust in that system. Therefore, I support one day paper ballot voting, voter ID, and hand counting of ballots at the precinct level.
