

Submitter:

Eric Person

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

This measure was proposed in bad faith for the single purpose of suppressing the vote in favor of those who can take a day off and stand in line indefinitely.

The demographics that would be most heavily disenfranchised by this are obvious: the working poor, communities of color, and people with busy and active lives.

Those unaffected are the addled retirees whose brains have been reduced to pabulum by oligarch-funded propaganda on right-wing news programs and social media.

It serves only those anti-democratic forces that are desperately attempting to establish a feudal oligarchy in the land of the free.

We the people have had entirely enough of this disingenuous nonsense masquerading as "election security."

It is merely theater.

Vote NO, nip fascism in the bud!
