

Submitter: J. Anderson

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB210

Im writing to condemn this bill on the grounds that it opens Oregon to the same exploits we have seen in recent years to gerrymander through hacked machinery, unfeasibly constrictive vote times, in person abusive coercion tactics, and thereby destroying the integrity of our election duties by stifling our voices. Given the existence of ballotproof and the ability of those using it to prove that the vote can be manipulated on the back end through the insecure machines that in person voting defaults to, the people of oregon would see more harm to their rights than any measure of good. This bill directly impacts all oregonians who already have barely any time for their own needs let alone having to waste countless hours to follow the restrictive pattern locations inperson voting always devolves into. Our ability to cast vote by mail is one of the features that makes us so effective and efficient to ensure everyone can do so without having to take a day off work to stand in line waiting for their turn only to potentially be turned away due to restrictive hours. You fill it out and drop it off on your way to or from work with plenty of accessibility points in every county. It is a well oiled machine that every state should employ.

For the sake of the order, do not pass this bill but set it ablaze and do not look back. Leave our voting rights alone!
