SB210

I strongly oppose this bill. The current system that we have in place has worked extremely well since its inception. Changing it would make voting more difficult for many, especially those who are elderly or disabled. I remember how difficult voting was before we changed to the current system- long lines, long waiting times, the difficulty of trying to get to the polls around busy work schedules. There is no legitimate reason to change it. This is just furthering the "big lie" that there are many instances of voter fraud, which has been disproven repeatedly in the courts after Trump LOST. Leave our current system alone!!
