Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Mandatory in person voting would be a great detriment to myself and my entire family. I work a normal 9-5 schedule that means taking time off to attend a voting site. Mail in voting is not just a convenience, but enables voting for all elections. Similarly my elderly parents would not be able to get to a polling place with regularity, but because of our mail in voting system they are able to participate in our elections. I am greatly concerned about the removal of mail in voting, and strongly believe that it needs to be not just an option but the default for all Oregonians. I have been impressed by the security measures we already have in place, needing to have my signature reverified before when it didn't appear to match up. I have no concerns about voter fraud under our current system of vote by mail, and great concerns about voter turnout and the availability of voting for all with our system taken away.
