Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I strongly oppose this bill. Our current system has worked extremely well since its inception. Changing it will make voting more difficult for everyone, especially the elderly and those with disabilities. I remember how difficult voting was before our current system was voted enacted- long lines, long waits, trying to make it to the polls around busy work schedules. There is no legitimate reason to change it. To do so would just be furthering the "big lie" that there was a large amount of voter fraud, which has been disproven repeatedly by the courts. Trump LOST in a legitimate election. Leave our current system alone!
