SB210

As mail in voting is a proven secure and easy way to vote I oppose this bill. Why make it more difficult for others to vote? In-person voting excludes many people who may not have the ability to get transportation to a voting location, have physical ailments which prevent them from queuing, or cannot get the time to vote because of work or family commitments.

This bill only serves to further marginalize voters and make voting more difficult overall, resulting in a balance of votes that does not represent the populace as a whole.
