Measure, Appointment or Topic:

SB210

This bill is an attempt at voter suppression. While I understand that the Trump administration is trying to destroy and privatize the USPS and voting by mail would be negatively affected by changes to the postal service, I disagree with the specifics of this bill. Unless election day is a holiday where people have the time to vote in person and the vote in person process is fast and accessible to all, this bill will only prevent mostly the working class and disabled from voting. The need for ID to vote also seems unnecessary. The people claiming that our elections are not secure are also the people who have admitted to committing voter fraud.
