

If anyone needs language for their testimony:

Senate Committee,

I strongly encourage you to oppose Senate Bill 210. Imposing the requirement for individuals to vote in person jeopardizes our democracy by reducing accessibility to voting for all Americans, including but not limited to individuals who: Work full time, work outside the hours of 8am-5pm when voting centers are open, have limited physical mobility, facing health challenges, caregivers of adults and children, those without or limited access to a mode of transportation. As you can imagine, this encompasses the vast majority of our population and therefore would immediately silence the voices of hardworking Americans who care about this country and their right to vote. Do not limit our freedoms.

Do not be complicit in a fascist regime bent on reducing the United States into a segregated, regressive, isolationist nation. Chose the people of Oregon instead of the would be king in Washington, d.c. Do not let this be your contribution to the historic times we live in. Do not let this be your legacy. Do better.
