Senate Committee On Rules

Measure, Appointment or Topic:

SB210

In a state among the highest voter turnout, among the most secure in voter fraud utilizing vote-by-mail system for decades; it sure feels like subversion of the democratic process, if not just blatant waste of our time and taxpayer money to orchestrate in-person voting. Anybody ever hear the phrase KISS, keep it simple stupid, or if ain't broke don't fix it?!

As a CAD designer, fabricator, builder, you would be looked at with incredulous stupidity if you suggested going back to standards relevant in the 80's. Which is what y'all are suggesting.

If I'm being really candid, this is what Russia (or Russian assets) would do to undermine a our voting systems.

I was under the impression GOVERNMENT WAS SUPPOSED TO MAKE LIFE EASIER FOR PEOPLE/FAMILIES, IMPROVE SYSTEMS OF GOVERNANCE, INFRASTRUCTURE, AND SOCIAL SYSTEMS! How does going backward in time help anyone but only those who are backward in ideology?
