SB210

I find that mail in voting, which Oregon has utilized for MANY years has worked well. I see no reason to change other than some 'wannabe tyrant' in the White House wants things his way and yet again is spreading erroneous information regarding mail in voting. This type of voting is not only convenient, but works well for those living in rural areas or those who have a difficult time getting to the polls. If however the convenience of constituents is not of importance to those at the state capitol, I would be very disappointed to hear that. PLEASE ... do not change a voting system that has proven to work well for our state!

Thank You!
