Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Here is the testimony I submitted:

The last time Oregon had a Republican Governor was in 1986. Once the mail-in voting took effect in 1987 we have had landslides voting in favor for the Democratic party. Our state used to be a Republican dominant state. I understand how time and many other factors can be taken into consideration for us to become a Democratic dominant state. However, looking at the counties, it is still the main cities of Portland and Eugene calling the shots for the entire state. This can not be a coincidence especially with how sudden the vote turned and has since stayed to the left.

If you really care about the voice of Oregonians, (Oregon citizens who reside, work, go to school, contribute to the community, and fund the state through our hard earning income), then let us Oregonians vote, leaving little to zero room for error. If you really care about making an environmental impact, ditch the paper trail and let us vote in person.

The ones who show up and

who can prove their legitimacy to vote, are the ones most affected by Oregon laws. We are tired of being overlooked in the state by the mounds of mail-in votes from questionable sources.

You have the opportunity to make an incredible impact by bringing back fair elections. And if you disagree and think that elections are already fair and that the people here in Oregon are still strongly voting in favor for the left, then you have no fear and nothing to lose. Why not give it a shot? Give us back our chance to be heard. Give us back our voice. Give the American Oregonian the right to be heard.
