Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Our current voting model (standard vote-by-mail ballots) have allowed people to vote at the convenience of their own time. We have some of the highest voter turnout of eligible voters and I have no doubt that our current voting model plays a huge role in this.

Switching to end mail-voting would drastically decrease voter turnout and create more of a hurdle for people to even be able to vote. I strongly oppose Measure SB210.
