Members of the Committee - Greetings!

SB 210 is, in essence, a blatant attempt to begin the repeal of voting rights.

First, they narrow the voting pool by refusing the vote to those who have mobility issues. But one can vote by mail, yes? One still has to go get the stamps because SB210 also removes the current requirement wherein the State pays postage. So, there goes the mobility-disadvantaged vote. (And don't even cite "budget concerns". That's a bunch of hooey.)

Next what? Or is it more aptly 'Next who?' ...

Denials based on mental/emotional issues? Who's going to decide that? What would it include? There are people who think the whole LGBTQ+ community is "mentally defective". So there goes that whole voting sector. (You do know, don't you, that God doesn't even want them to live?)

Women voting? Hah, they can't even decide what to where without asking a man! There goes that bloc ...

Where does it stop?

Don't listen to the dominance freaks.

Don't bother with voting "No" on SB 210 - vote "HELL, NO"!
