SB210

Purposely enforcing an in-person-only model for voting will negatively impact voting accessibility. We need to encourage voter participation not discourage it. Removing the mail-in standard will make legitimate voting more difficult. There has been no evidence to show that mail-in voting is more prone to fraud than in person voting. We need to not give credence to unsubstantiated reports of voter fraud from unreliable sources. Oregon's current system of mail-in voting should not be changed.
