SB210

Vote NO on this bill. I have lived in states that have in-person voting as the standard method and now here in Oregon where Mail in voting is available. Mail in voting reduces barriers for many voters who experience disabilities, and other barriers to being able to get to a voting site in person. The propaganda narratives related to mail in ballots and voting fraud is nothing but propaganda designed to perpetuate distrust, and encourage election denial. This bill would not only create barriers for access to the right to vote, it amplifies propaganda put forth by leaders who DO NOT want voters in opposition to have the opportunity to do so. There is no historical evidence to support that alternatives to in-person voting have been problematic or have resulted in fraudulent practice. VOTE NO on this bill.
