SB210

To the short-sighted lawmakers trying to push this piece of trash legislation: what are you even thinking? I have voted by mail my entire life. Every single voting cycle I have participated in would have been a hardship upon my various jobs I've worked over the years, and several may have been prohibitive at best, regardless of the legality. Since voting day is not a national holiday, with all businesses and industries (including critical ones) closed, I do not understand how this proposed legislation could ever be seen as reasonable except as a way to suppress voter turnout and participation, as workers would be forced to choose between participating in democracy and engagement in their jobs. This SB is a waste of everyone's time, I strongly suggest you find better problems to solutionize that actually matter, and can improve people's lives.
