

RE: SB 210; Making in-person voting the standard method for conducting an election.

To my congress people:

PLEASE VOTE AGAINST THIS BILL!!!

KEEP OUR METHOD OF MAIL IN BALLOTS!!!

Voting by mail has worked for 30 years with de minimis fraud or negative issues.

Voting by mail is convenient and helps promote more voter participation.

Voting by mail allows those voters with disabilities that limit their capacity to travel to participate with their vote.

Voting by mail saves the pollution caused by travel to the polling sites.

Voting in-person will likely cause long lines of voters, effectively dissuading some voters who don't have the time to wait in line.

Voting in-person can be negatively affected by the weather.

Voting in-person is inefficient.

Voting in-person will require personal identification, which is redundant since it was already provided at the time of the voter registration.

Voting in-person is subject to intimidation.
