Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I oppose forcing individuals to vote in person. There is no proven need to rescind a voting practice that Oregonians like myself have been participating for the whole of our voting life. Vote by mail is safe, and secure. It cannot be tampered with way Elon Musk tampered with the voting computers during the 2024 presidential election. It has never let us down and there is no reason to give into the orange dictator in DC just because he's not able to remotely tamper with our votes. Voting in person is a hardship for every one to take time out their day but especially to lower income voters who typically are not able to take the time off required to go to vote in person. This is a distraction for the real issues - that fascism is taking over our country. With almost 30 years of voting by mail without issues why is this even being proposed? To derail us from things that are truly important! The governments job is to care for the people. Not to make rich men richer. Care for people. Vote by Mail is caring for the people by allowing equal access for all of us to do our civic duty and vote. Do not comply with the current administration. We are a democracy!
