SB210

I strongly oppose any change in current Oregon Election Rules. Forcing all voters to appear in person on a single day will be expensive as well as inefficient, and will result in fewer voters participating in elections. The proven, secure, and accurate mail-in ballot process is far superior, and allows the voters in Oregon to easily participate in elections. If enhanced validation of voter registration is necessary, there are many months between elections that can be used to validate voters' registration. Do not try to combine that process into the same day as voting!
