Senate Committee On Rules

Measure, Appointment or Topic:

SB210

This bill is nothing more than an attempt to suppress votes. As a mom of two children under the age of three with a partner who as paid work full-time, we do not have hours to stand in line to vote. Mail in voting has proven to be effective, efficient, and does not produce voter fraud like Republicans would have us think. The data does not match their talking points. As a voter, I love mail in voting. I'm able to fully research what I'm voting for while I'm doing it from the comfort of my own home. I do not have to stand in line with my two toddlers. My spouse does not have to request off from work because he does not get time off to vote. This bill is downright silly and should not go anywhere but this one conversation. We all benefit from everyone having the opportunity to vote and mail in voting provides that. Let's not move backwards anymore than we already have since 2025 began.
