SB210

Hello,

I just wanted to give my testimony that having to vote in person will potentially be a real hardship for me.

For personal reasons, I'm periodically unexpectedly unable to be out and about, and having to vote in person is one of those things I might not be able to do just when I need to be able to vote.

Voting by mail makes it so that I can vote even if I am unable to be out and about on election day.

I'm a hard working American small business owner who has been a productive member of society my whole life, and having this extra barrier to doing my civic duty seems very unfair to me.

Please consider people like me when making your decision and consider saying no to this bill.

Sincerely,

Your constituent
