Senate Committee On Rules

Measure, Appointment or Topic:

SB210

When I moved to Oregon, many years ago, I found Vote by Mail very civilized. I didn't have to take time off work or school.

I could mail the ballot or drop it off to a secure voters box at my own time as long as it was before the election cut off.

I didn't have to worry about being out of town or ill. My vote would be counted! To have this change some 30 years later, I am concerned!

I am 72 years old and mobility is becoming an issue for me. To have to physically go and wait in line to vote seems totally ridiculous!

I want the time in my own home to do the research, to make good decisions without any pressure.

I don't want some voting machine manipulating my choice after the fact to something I oppose!

PLEASE, we in Oregon have an excellent record of using Vote by Mail safely and efficiently.

Do break something that works well! And don't make it easy for the elections to be hacked!
