Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

In person voting should absolutely be the way we vote...one day election, not weeks of additional ballots rolling in from god knows where. Voter ID should ABSOLUTELY also be required, we have to show ID to purchase lottery, to purchase alcohol, to get on an airplane, to appear in court, to apply for a loan...the most important things Americans do, voting, should be 100% secure, for legal citizens only and with proof of ID. In person voting would bring back the pride and confidence in the American process. Mail in voting allows to many mistakes. We have already seen the issues with the DMV registering illegal immigrants to be able to register in our elections, how many other times has this happened that wasn't discovered? Every single citizens has the ability to have ID to do this, it is not hard. It is time to strengthen our elections and give back the confidence of a secure and honest elections to Americans. In person voting reduces the risk of fraud and giving greater security. Please give the people back confidence in our elections as it has been lost right now. I urge you to support SB210.
