Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Absolutely AGAINST this proposed bill. Mail in voting allows more people to have their voice heard, and ensures citizens can have equal opportunity to vote without constraints such as work hours, weather conflicts, childcare availability or travel conflicts. The entire point of a VOTE is to assess and respond to the desires of the potentially affected constituents. The more flexible the voting procedure(s), the greater swath of citizens able to express their desire through their vote. In Person voting could discriminate against elderly voters who don't have transportation to the polling locations, poorer folks who don't have transportation or who have multiple jobs and responsibilities. Please retain the current OPTION to vote by mail!
