SB210

As someone who loves the state of Oregon, I support this bill to return our method of voting to in-person and on the date of the election. While I have not personally experienced difficulties with the mail-in system, I know people who have not been sent a ballot to their current address, whose ballots were not counted for various reasons, or who were mistakenly sent multiple ballots. All of these things cast doubt on the integrity of our voting system. To ensure confidence in our elections, mandating in-person voting is a simple and realistic improvement.

To anyone who might claim this bill would make it harder to vote, I suggest that person should read the text carefully. There are provisions that would allow those who cannot vote in person to request an absentee ballot. This bill would restore trust in our elections without adding unnecessary burdens to the citizens of our state.
