Measure, Appointment or Topic:	HB3729

House Committee on climate, energy and environment

Regarding HB 3729

I am sure you will hear and read plenty of testimony supporting HB 3729 and all for good reasons. Without telling you again what you will hear and read I urge you to ask yourself why Oregon would be the last State in the union to pass such legislation. This Bill is long overdue for several reason and its time Oregon followed what all other States realized in years past to make temperatures lower in our crematories. Please support the passage of this bill.
