SB210

I don't see the value of returning to in-person voting. Mail in voting is safe and secure and convenient. In-person voting will impact people who aren't able to get to a polling place because of either mobility issues or scheduling. This move to roll back to the good old days of having a handful of polling stations, taking off work, finding parking, etc, seems to have a heavier burden at a class level, which seems the intent.
