Measure, Appointment or Topic:

SB210

Oregon has led the way since the early 1980s to show that vote by mail is safe, secure and more importantly, what voters want in Oregon. Vote by mail ensures that busy families, the elderly, and the disabled can vote from the comfort of their homes. Given that it is 2025 and not 1950, we have the technology, we have the resources, there is no reason to go back in time to an antiquated system of voting. Especially since there is no actual data demonstrating any issues of voter fraud with our current vote by mail system. This is a problem that does not exist and is another attempt by the Republican Party to suppress voters because their policies are not popular and the only way to move their politicians or failed policies through is to suppress the vote. This is a manufactured crisis used to distract us from real problems. There is nothing wrong with our vote by mail system.
