Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Our mail-in system is working extremely well. Information about candidates and issues arrives in timely manner, and safeguards are in place to protect the ballots. If it isn't broken, don't mess with it. I am concerned that requiring in person voting is another way to reduce the number of citizens who vote. And accusing election officials of interference sounds like a projection of what the supporters of this bill want to do if the bill passes.
