Measure, Appointment or Topic: HB3940

Where are the bills to stop mismanagement of forest and reducing wildfires? This is the underlying problem.

Combining so many taxes in one bill is not acceptable; how do you separate what few may be worth supporting?

Making taxes adjust with the CPI (or any index) doesn't allow for any downward adjustment (pandemic, remember?). We ask our representatives to make adjustments to taxation based on current life conditions, and not lock in automatic increases.

Thank you.
