Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Totally oppose this Trumpian effort to control elections. Oregon has been setting the standard for vote by mail and there is no corruption or disruption to voting using this method. "If it ain't broke, don't fix it" should apply here. Forcing elderly, disabled and working people to stand in line at the polls to vote is unnecessary and onerous. This proposal would preclude many people from voting. Oregon achieves high participation in voting through the use of mail in voting. This blatantly Republican attempt to eliminate voters from expressing their views should be overwhelmingly denied by the legislature without even discussing the merits as there are none - only downsides. OPPOSE this Bill again and again. Consider the source of the person offering the Bill.
