

Submitter:

Gary Weir

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

I work from 5 am to 5pm daily as a blue collar worker, a metal fabricator, I and others like me represent the backbone of society and cannot afford to disrupt production and take the time off work to be stuck in traffic or standing in line to reach a voter booth. I turned 18 in 2000 when I graduated highschool and have been voting every chance I get since that time. I will not let the Republican party take my rights away as a voting upstanding member of society, and I will not stand to let them disenfranchise the rights of every other citizen over a made up issue that simply does not exist. The mail in system has never failed and is the safest and most convenient way to vote that should be spread across the nation to every single state there is and will be, not to mention the military overseas will surely be dismayed that even though they fight for this country and the constitution that their rights are stripped away by a handful of degenerate republican scum that should be imprisoned for the attempted coups of our citizens rights. It is a bold act of treason!
