

SB201

I have had the privilege of using vote by mail since 1981 and it's been the best access to the ballot box that I have ever seen. Regardless of age, sex, income, religious affiliation, political affiliation, status or background all citizens of the US that reside in Oregon have the exact same access to voting. When you see how voting in person discriminates against those that cannot stand the heat (Texas), the cold, the rain or the distance to in person voting, then you question the values of anyone wanting to abolish this method. In the tradition of any absolute authoritarian the sponsors of this bill seek to curtail your right to vote, perhaps finally making voting an impossible sham with only one candidate as the USSR is quite familiar with.

Vote against this anti American bill
