Senate Committee On Rules

Measure, Appointment or Topic:

SB210

As rampant fraud utilizing the current system has NOT been proven here or anywhere else? I am vehemently opposed to any measure that makes it MORE difficult and cumbersome for individuals to vote. This will be wildly impactful, predominately for marginalized groups; the elderly (they're going to be busy, trying to find a Social Security Administration office near them, to conduct their transactions and maintain their benefits) anyone without transportation or the ability to take leave from work to appear in-person on election day, to cast their ballot. I am hopeful that the state of Oregon will not hitch our wagon to the paranoia and false claims being espoused by the current POTUS and his minions also known as the "administration". The "leadership" in Washington currently has a couple of things on their minds: to make themselves and those like them richer, and to silence the rest of us especially anyone who opposes them.

How many females of voting age, have ever been married and therefore the name on their issued birth certificate no longer matches what is on their Social Security Card OR their state issued, Driver's License or ID? Yet another way to silence women or anyone else who opposes a political stance. Of all the real life, proven issues and crisis we have to contend with, in Oregon right now? this one? Is an utter waste of time and resources in addition to needlessly pandering to Washington.
