Maile Knight

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

To whom it may concern,

Voting by mail has been one of the best things for Oregon. It offers those with physically limiting disabilities the capability of having their voices heard without undue stress that forcing them to go to the polls would. And it gives access to those that are house bound the ability state their opinion on how they want to live in the state they live in.

It offers options for working families and the ability to have discussions about voting at the kitchen table making it a learning opportunity for those who are not yet of age to vote to create a new group of people who will stand up and use their civic rights to say how they want to live.

It is safe, I feel the ultimate confidence in my state to have mail in ballots and have them fair and mailing my vote does not promote election fraud. We have had many many years of this, there is no reason to take something that increases voter turnout removed from our state.

Thank you for your time,
Maile Knight
