Measure, Appointment or Topic:

SB210

Accuracy of voting is utmost of importance and the ONLY way to ensure accuracy is the way the founders expected: Citizenship, In Person voting, with ID. It's insane anyone would lower the standard of voting to do so from your lazy boy chair without having to make any form of effort. Presenting ID has never been a barrier by the voter. When removed from the voter into the hands of a 3rd party to acknowledge "a" signature the integrity is zero. No one in their right mind would continue to support vote by mail unless they were on drugs, heavily inebriated or mentally ill. Since 1986 this vote by mail debacle has resulted in nothing but disastrous policies clearly NOT reflecting the taxpayers. Politicians, judges and those on PERS clearly have a conflict of interest in the way they benefit by their influence.
