Senate Committee On Rules

Measure, Appointment or Topic:

SB210

This seems to be a voter-suppressive and discriminatory proposal that would disallow for non-ambulatory voters, voters who rely on care takers, disabled voters, voters who live in remote locations where public transportation is limited, to engage in their legal and constitutional right to vote. This proposal also does not take in account the time allowed needed for in-person voting, whether an individual can request or be allowed time off of work, how much time, will they loose pay? All citizens must be able to vote and be heard, not just the ones you want to be heard.
