SB210

Our mail-in voting system has been more than adequate, allowing a high proportion of the state's voters the opportunity to vote. It is a success story and a role model for other states wishing to transfer to vote-by-mail. In-person same day voting could open the door for voter suppression. It would also make it difficult for those who find it difficult to travel, are at home with small children, or any number of factors that might keep them away from a voting booth. Please, do not dismantle a system that works, and works well!
