Senate Committee On Rules

Measure, Appointment or Topic:

SB210

There's no evidence that in person voting would change or improve election integrity. However, there is plenty of evidence that this regression would make voting harder and more expensive. This would only serve to reduce voter participation, which is exactly what MAGA needs to gain and retain political power. They know they can't win elections straight up, so they rig need it. DON'T FALL FOR IT!!!
