Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB210

The first time I voted when I turned 18, we voted on the day , we showed our ID and we signed in.. I believe this is the safest most accurate way to get honest results....there are ways to help people get to the polls and make it possible for all to vote.. my husband died in 2018 , for at least 3 years after he died I received ballots for him .. I could have filled his ballot out ..I did not and I advised the office but the ballots kept coming .. . Voting is important..our communities should make it possible for people to leave work to vote and give them rides etc but we all should vote in person with ID ..we did it before and we should be doing it now.. then there are no doubts .. I was proud to go in and vote ..we need to help all citizens vote..that is where we should make the change ..no more mail in ballots ..
