SB210

Hello. I'm a disabled 47-year-old cancer patient who is not affiliated with a political party. I'm writing to oppose changing Oregon voting to an in-person format. Here in Oregon, our vote-by-mail system is a huge success. It ensures access to all Oregonians, including seniors, the disabled, working parents, and many others who have mobility, transportation, and scheduling challenges. We already process both regular and absentee ballots successfully. There has been no credible evidence of wide-spread "voter fraud." Such trumped-up falsehoods are inventions used to increase partisanship and to discourage voter participation. Please consider the seniors, the disabled, and others who have a right to participate in governance, but will find doing so in-person prohibitive. Don't fix what's not broken. Keep Oregon's vote-by-mail system!
