SB210

Oregon's vote-by-mail system protects the ability of disabled, chronically ill, and working-class citizens to vote in every election. Without this system, it would be difficult or impossible for many citizens in Oregon to vote. This proposal is a clear response to President Trump's unconstitutional and illegal executive order mandating changes to all vote-by-mail systems. Our state has used a vote-by-mail system successfully for many years and our democracy would only be harmed by repealing it.
