Senate Committee On Rules

Measure, Appointment or Topic:

SB210

Voting in person is a privilege and not possible for people with jobs that do not give them time off to vote, or those with families or people in their care that can't be left at home, or those with transportation barriers. It should have never been the default, and should not be the default until every single person gets the day off of work, free transportation and child care so they can get to the polls. This will be at setback the self-proclaimed progressive state of Oregon.
