Measure, Appointment or Topic: HB3940

I strongly oppose this bill. Combining so many taxes into one bill is a disservice to what is acceptable and what is not. Burning up money is NOT a fix to the underlying problem!

The current trend of making taxes adjust with the Consumer Price Index or any index is an increase in taxes without representation! Particularly when it doesn't allow for a downward adjustment as in this bill. Nor does it take into account extenuating circumstances - such as the lockdown during the pandemic.

Get rid of this bill. It's just another excuse to overtax the citizens of Oregon. Why isn't anyone thinking of a way to get rid of state taxes?
